Class 2   (5/9/20)   Date - 5/9/20
                                       Roll No - 17010208
                                       Pages - 1

Software ① A set of instructions.
          ② consists of appropriate data structure.
             DS that enable the program to
             adequeatly manipulate information
          ③ Documents that describe the use and
             operation of software.

Three types of documents:
① Inline documentation → in the form of comments
② Technical documentation → description of each module in
                              software

③ User documentation →

Q1. Why does it take so long to get software completed?
→ Huge liability so need some time limit

Q2. Why does it costs so much to develop a software?

Q3. Why can't we find all bugs before giving software
      for customers?

Q4. why do we continue to have difficulty in
       measuring the progress of software development
